How to identify the unit alarm code

- Indoor unit

- **Form the remote controller**

You can get the alarm code from the remote controller, at the same time, the indoor unit has stopped running.
The wireless receiver

You can get the alarm code from the wireless receiver, at the same time, the indoor unit has stopped running with the “DEF” and “FILTER” lights flashing.

- Example -

Alarm 3 5

“FILTER” (yellow lamp)

“DEF” (green lamp)

“DEF” blinks 3 times (0.5 second ON / 0.5 second OFF)

“FILTER” (yellow lamp) blinks 5 times (0.5 second ON / 0.5 second OFF)

“Run” (red lamp) blinking (1 second ON / 1 second OFF) indicates abnormal transmitting between Indoor Units and Outdoor Unit.
Ceiling & Floor Type

Compact 4-Way Cassette

➢ The panel

You can get the alarm code from the panel, at the same time, the indoor unit
has stopped running.

- Outdoor unit

You can get the alarm code from the 7-Segments LED display, at the same time, the outdoor unit has stopped running.
